### SKILLS

- HTML
- CSS
- Tailwind CSS
- Javascript
- Typescript
- React
- Next.js
- PostgreSQL
- Prisma

### EDUCATION

#### SOFTWARE ENGINEERING

Bachelor of Software Engineering

Ontario Tech University | 2018 - 2023

### EXPERIENCE

#### CHARGE-UP INVOICE APPLICATION

A Next.js full-stack application that makes use of the app router functionality to handle API fetching. The application uses NextAuth for handling user authentication and Tailwind CSS for styling. Users are able to add, remove, edit, and manage invoices all to their needs. All data is saved to a PostgreSQL database that is configured through Vercel's database UI. The application is completely responsive and allows for users to switch between dark/light mode.

#### TODO-LIST APPLICATION

A todo-list application that uses CRUD operations to add, remove, edit, and delete todos. The application uses React & Vite as the Javascript framework, Redux for state management of handling the todos, and Tailwind CSS for the styling. With a responsive design and options for dark/light mode theming, users are also able to sort through current active and completed todos, clear all completed todos, and easily manage all todos.
