I am an organized and dependable candidate successful at managing multiple priorities with a positive attitude and currently pursuing a full-time position in the field of web development, where the skills that I have learned from working on both academic and personal projects will provide as my experience and foundation. I hope to contribute by putting in my full effort and continuously cultivating my skills to further improve myself. I have a willingness to take on added responsibilities to meet team goals.

Education

Bachelor of Software Engineering, 2018-2023
Ontario Tech University, Oshawa
- Relevant courses – web development, data structures, object oriented programming
- **Web Development Course Final Project** – Only Happy Mistakes
  - A gallery application allowing users to manage artwork and optimizes the uses of tagging to allow users to find the relevant artwork they need with maximum efficiency
- **4th Year Capstone Project** – PixelSort
  - Successfully created a mobile Android application that allowed users to be more time-efficient in managing all of their images by removing redundant and low-quality images

Project Experience

Charge-Up, Full-stack Invoice Application | View | GitHub
- Boosted user efficiency and utilization of time with management of invoices all in one place
